The "Date Arrived in ED/Acute Care" element (TR18.55) is defined as "the date the patient arrived to the ED/hospital". If you used the 'Date/Time Helper' from the Demographics Screen, this information will already be in the system. Also, if you would prefer not to type the date in, click on the calendar icon and select a date. The date is used to auto-generate two additional calculated fields: Total EMS Time (elapsed time from EMS dispatch to hospital arrival) and Total Length of Hospital Stay (elapsed time from ED/Hospital Arrival to ED/Hospital Discharge). This is a national Data Element.

The "ED/Hospital Arrival Time" element (TR18.56) is defined as "the time the patient arrived at the ED/hospital". The time is used to auto-generate two additional calculated fields: Total EMS Time (elapsed time from EMS dispatch to hospital arrival) and Total Length of Hospital Stay (elapsed time from ED/Hospital Arrival to ED/Hospital Discharge). This is a national Data Element.
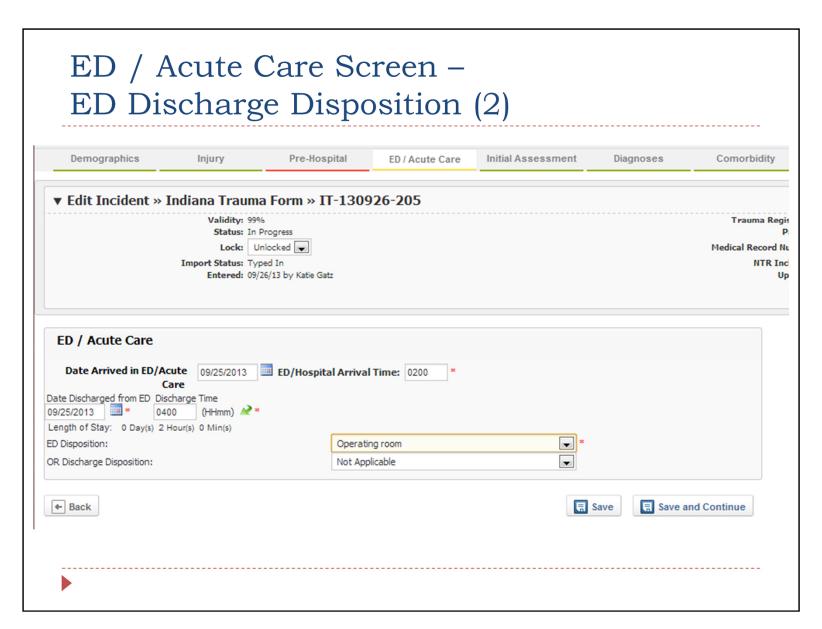

ED / Acute Care Screen (4)

The "Date Discharged from ED" element (TR17.25) is defined as "the date the patient was discharged from the ED". If you used the 'Date/Time Helper' from the Demographics Screen, this information will already be in the system. Also, if you would prefer not to type the date in, click on the calendar icon and select a date. The date is used to auto-generate an additional calculated field: Total ED Time (elapsed time from ED admit to ED discharge). This is a national Data Element.

The "(ED) Discharge Time" element (TR17.26) is defined as "the time the patient was discharged from the ED". If you used the 'Date/Time Helper' from the Demographics Screen, this information will already be in the system. The date is used to auto-generate an additional calculated field: Total ED Time (elapsed time from ED admit to ED discharge). This is a national Data Element.

The "ED (Discharge) Disposition" element (TR17.27) is defined as "the disposition of the patient at the time of discharge from the ED". You select an option from the drop-down menu. This is a national Data Element.

ED / Acute Care Screen – ED Discharge Disposition

If "Died/Expired" is selected in the "ED Disposition" element, one new data element will appear on the form that will allow you to further explain the details of the death. The data element "Signs of Life" (TR27.14) is defined as "Indication of whether patient arrived at ED/Hospital with signs of life". Select an option from the drop-down menu. This is a national Data Element.
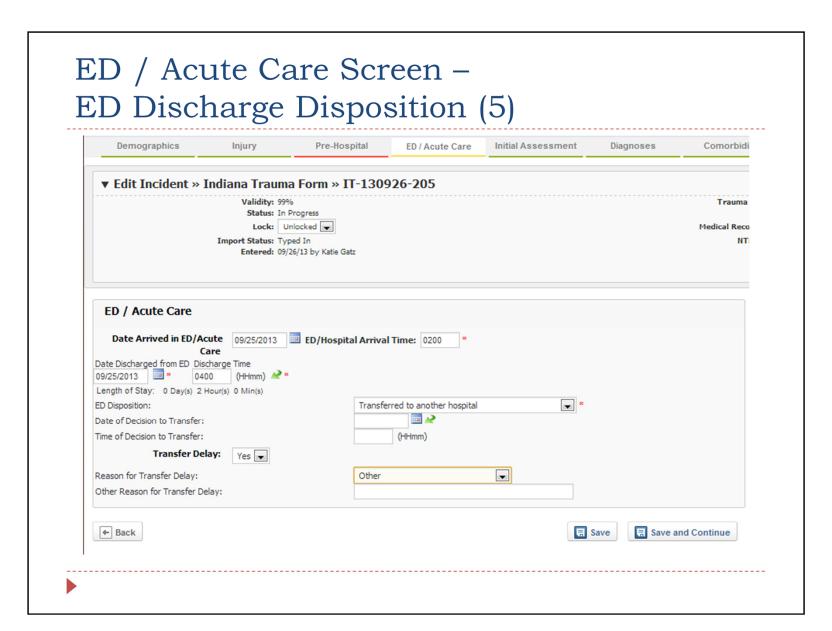

ED / Acute Care Screen – ED Discharge Disposition (2)

If "Operating Room" is selected in the "ED Disposition" element, one new data element will appear on the form that will allow you to further explain the details of the disposition in the Operating Room. The data element "OR Discharge Disposition" (TR17.28) is the disposition of the patient following post-anesthesia recovery. Select an option from the drop-down menu.

ED / Acute Care Screen – ED Discharge Disposition (3)

If "Transferred to Another Hospital" is selected in the "ED Disposition" element, three new data elements will appear on the form that will allow you to further explain the details of the transfer. The first data element "Date of Decision to Transfer" (TR17.41) is defined as "the date it was decided that the patient would be transferred". If you used the 'Date/Time Helper' from the Demographics Screen, this information will already be in the system. Also, if you would prefer not to type the date in, click on the calendar icon and select a date. The second data element "Time of Decision to Transfer" (TR17.42) is defined as "the time it was decided that the patient would be transferred". The last data element "Transfer Delay" (TR17.45) is defined as "whether or not there was a delay transferring the patient to another hospital". Select an option from the drop-down menu.

ED / Acute Care Screen –
ED Discharge Disposition (4)

If "Yes" is selected in the "Transfer Delay" element, one new data element will appear on the form that will allow you to further explain why the transfer was delayed. The data element "Reason for Transfer Delay" (TR17.44) allows you to select an option from the drop-down menu as to why there was a delay in transferring the patient out.

ED / Acute Care Screen – ED Discharge Disposition (5)

If "Other" is selected in the "Reason for Transfer Delay" element, one new data element will appear on the form that will allow you to further explain why the transfer was delayed. The data element "Other Reason for Transfer Delay" (TR17.43) allows you to explain in a text format the reason why the transfer was delayed.

Click the "Save and Continue" button to save the information just entered and to continue to the next tab. Clicking the "Save" button will save the information, but you will not progress to the next tab.
